750V

The 750 Vacuum removes your pit contents using a 160 CFM Masport Vane-type vacuum pump, powered by a 9 HP Briggs Vanguard engine. A 11 HP Honda engine is available at extra cost. The tank capacity is 650 gallons.

The vacuum pump develops up to 26 inches of mercury vacuum intermittently, and 20 inches continuous inside the tank. Excellent for deep pits. The pump also features an automatic lubrication system.
